Gerber Technology's software solutions lead the way – expert presentations, best practices, news as well as tips & tricks for users on the following topics.
 - YuniquePLM – it's unique for a reason
 - Line Planning: How to create & define an assortment, piloting your complete collection
 - Discover the extensive functions of AccuMark 8.4
 - AccuMark, AccuNest, AccuMark V-Stitcher
Tips + tricks for users
- 17:00 h Finish

Are companies working to save the world? Is profit more important than responsibility? Corporate Social Responsibility and sustainability principles open up new chances in a competition which is growing ever more multifaceted. Companies with experience in implementation of CSR and sustainability elements reveal targets, paths, successes. – In addition, there is basic information straight from

the University and up to date PLM/PDM solutions for the sustainability-aligned product development. The highlight: an Impulse seminar with psychologist and coach Louis Lewitan on management stress and staying composed. The 4th TM-Gerber Business Forum – it takes the stage this time in the University of Applied Sciences in Mönchengladbach.
